Forthcoming

Monograph contracted to Oxford University Press

- ***Crisis and Revolution. State Failure and The French Revolution*** is approx. 250 pp. (O.U.P. for delivery December 2021, publication late 2023?)
I see this as a major new way of looking at the origins and nature of the French Revolution, of wide interest to scholars in related fields. As it offers a new view it should be widely debated by sociologists, political scientists and historians.

Widely reviewed, notably by Dale Van Kley (H-France) who called it the best work on the cultural history of the Revolution since 1989.*
- • *The Origins of the French Revolution* viii + 371 pp. for 160,000 words. (Palgrave, Basingstoke and New York: 2006), Lead. 40,000 words by me. Notable H-France review by Censer.

Forthcoming article and chapter

- ‘Crisis and revolution’ This is currently in full draft except for the notes, destined for JMH or FHS, my new view summarized.

A second contracted book on 1789, for OUP. The Press has approached me to write a book entitled *The Fall of the Bastille*, which corresponds to one of my courses. I am proposing instead a book on the year 1789, a balanced but positive view of the first year of the Revolution. It will be similar in coverage but different in content after 70 years to Lefebvre’s 1939 classic *The Coming of the French Revolution*. It is in the same series as Stuart Carroll’s book on the Guise and Colin Jones’ on *Thermidor*. For 2021. Intended to provoke debate, it reaffirms a positive view against the current vogue for Revolution as essentially identified with Terror.

A firm book and current research project:

I am preparing a book on French Patriotism from its inception to the present, though focusing on its development from an ambiguous discourse that legitimated intervention in the public sphere, to an ideology people would and did die for first in the Revolution then in the First World War.

The first third has already been published in the form of long articles.
